VARTA AGM POWERSPORTS TECHNOLOGY

Hard revving, long rides or all kinds of weather are never problems for the rugged VARTA powersports AGM battery. Designed and built with extreme conditions and long life in mind, so you always have maximum power with no loss in performance. The battery resists vibration, is certified NONSPILLABLE, so it mounts in any angle, and is permanently sealed and maintenance-free.

Featuring AGM (Absorbent Glass Mat) technology

Quality built battery terminals reduce corrosion and prevent acid leakage, ensuring the battery lasts longer

Valve regulated venting system releases gas in case of a pressure build-up, in a safe and controlled manner

Cell connectors join the individual battery cells together via the plate block, creating a shorter energy path and increasing starting power

Extra-strong case protects against extreme temperatures and rugged terrain

Specialized grid design creates optimum conductivity and high-resistance to vibration, essential for off-road riding

Advanced Absorbent Glass Mat (AGM) separators absorb the acid evenly in the battery, providing high cyclic stability. This enables the battery to be repeatedly charged and discharged without loss of performance

Certified NONSPILLABLE so it can be installed at any angle.

VARTA batteries can be delivered through standard shipping because they are classified non-hazardous.

PROP 65 WARNING

Battery posts, terminals and related accessories contain lead and lead compounds, chemicals known to the State of California to cause cancer and reproductive harm.

Batteries, also contain other chemicals known by the State of California to cause cancer.

Wash hands after handling.
